

Lucia Herrera

Senior Frontend Engineer | Mexico City, Mexico

Languages: Spanish (native), English (advanced)

Summary

Frontend engineer with 7 years of experience building SaaS products in React and TypeScript. Strong ownership of design systems, dashboard UX, accessibility, frontend performance, and test automation in cross-functional product teams.

Experience

OrbitFlow | Senior Frontend Engineer | 2022-Present

Led delivery of complex workflow dashboards in React 18, TypeScript, TanStack Query, and Zustand for a B2B operations platform.

Reduced initial page load by 34 percent by splitting bundles, deferring heavy charts, and optimizing data-fetching patterns.

Created reusable UI primitives aligned to Figma specs and adopted across 5 product squads.

Implemented Jest, React Testing Library, and Playwright coverage for critical user journeys.

Partnered with product and design during discovery to refine acceptance criteria and reduce rework.

NorthBay Software | Frontend Developer | 2019-2022

Built internal admin panels with React, Next.js, TypeScript, and REST APIs.

Improved accessibility on forms and tables using semantic HTML, keyboard navigation, and screen-reader-friendly labels.

Skills

React 18, TypeScript, Next.js, Vite, Zustand, TanStack Query, Tailwind CSS, Storybook, Jest, React Testing Library, Playwright, Figma, GitHub Actions

Education

B.S. in Computer Engineering, Tecnologico de Monterrey
