

Valentina Rojas

React Frontend Developer | Santiago, Chile

Languages: Spanish (native), English (professional)

Summary

Frontend developer with 5 years in React product teams, especially admin tools and data-heavy SaaS modules. Strong with TypeScript, API integration, responsive UI, and collaboration with design and backend.

Experience

DataSprout | React Frontend Developer | 2023-Present

Built customer reporting screens in React, TypeScript, Vite, and React Query.

Owned loading, error, and empty-state UX for several API-driven modules.

Collaborated with backend engineers to reshape payloads and simplify frontend state.

BlueHarbor | Frontend Engineer | 2020-2023

Implemented reusable table, filter, and modal components used across an internal operations suite.

Added test coverage with React Testing Library and documented component behaviors for teammates.

Skills

React, TypeScript, Vite, React Query, REST APIs, Tailwind CSS, React Testing Library, accessibility basics, Figma handoff

Education

B.S. in Software Engineering, Universidad de Chile
