

Paula Medina

QA Automation Engineer transitioning to Frontend | Buenos Aires, Argentina

Languages: Spanish (native), English (advanced)

Summary

QA automation engineer with solid product collaboration and strong testing skills. Recently moved into frontend feature work using React and TypeScript, but production ownership is still limited.

Experience

CloudBench | QA Automation Engineer / Frontend Contributor | 2023-Present

Built Playwright end-to-end suites for customer-facing React flows.

Contributed small React and TypeScript fixes on filters, validation messages, and test IDs.

Worked closely with frontend engineers to reproduce regressions and improve component reliability.

SoftMetric | QA Engineer | 2020-2023

Owned regression strategy, API test automation, and release signoff for a SaaS platform.

Skills

Playwright, Jest, React basics, TypeScript basics, debugging, API testing, quality processes, cross-functional communication

Education

B.S. in Information Systems, Universidad de Buenos Aires
